

## **First Unitarian Universalist Society of San Francisco Resolution to join the Spiritual Alliance of Communities for Reproductive Dignity**

We the First Unitarian Universalist Society of San Francisco do resolve to join the Spiritual Alliance of Communities for Reproductive Dignity. To uphold this resolution to join the Spiritual Alliance of Communities for Reproductive Dignity, we pledge, affirm, and commit to the following:

We are committed to equity, dignity, and holistic well-being for all people. We recognize that reproductive issues are integral to social justice and thus our fundamental moral concerns. As we are fully committed to the flourishing of human lives, we understand that reproductive concerns are inherently linked to intersecting systems of oppression, particularly those of patriarchy, racism, and poverty. We affirm that reproductive health is central to our social justice agenda.

### **We, therefore, affirm the following guiding principles:**

1. All creation is good and includes a beautiful diversity of sacred bodies, sexualities, and reproductive journeys.
2. We respect and affirm the moral agency and bodily autonomy of all people. We vow to work against anything which constrains reproductive rights especially when the target is women, queer people, gender diverse people, people with disabilities, immigrants, Indigenous populations, and people of color.
3. Reproduction is a personal responsibility, and decisions to have children, to not have children, or to end a pregnancy are equally moral.

### **And therefore, this community commits to:**

4. Creating a loving, justice-seeking faith community where shame, judgment, and stigma for diverse reproductive decisions and journeys have no place.
5. Supporting the work of parenting and the healthy growth of children in safe, sustainable, nurturing communities.
6. Advocating for equitable access to the full spectrum of comprehensive reproductive healthcare as a moral and social good. We support the fulfillment of reproductive moral agency for all.
